

Demonstration Event of the EFFORTS Project on Ports & Environment

22-23 September 2009, Le Havre, France

EFFORTS (EFFective Operation in pORTS - www.efforts-project.org) is an integrated project supported by the DG research of the European Commission in the 6th Framework Programme (FP6). Launched in May 2006, it is now close to its end.

We are very pleased to invite you on September the 22nd & 23rd 2009 in the Port of Le Havre in France to come and see the demonstration of the results of the project by the laboratories and industrial partners. Following topics will be addressed:

- New ballast water treatment onboard ship & impacts on EU Ports water quality
- Preventing quay from corrosion, impacts on EU Ports water and dredged mud
- Innovative solutions to reduce EU Ports air pollution

The demonstration event is organised as an essential part of the project in order to assess and present the achieved results. In this event, you will experience how EFFORTS results can support to:

- Improve EU port operations competitiveness and sustainability,
- Enhance the communication among the port communities, and
- Enhance the use of innovative sustainable solutions in EU ports.

At the same time the Clean Energy Management partners are very pleased to invite you on September 22nd, 2009 in the Port of Le Havre in France to come and see the demonstration of their research results, addressing the topic of:

- Optimizing the energy mix by including renewable energy sources to mitigate CO₂ production and increase profitability of EU Ports

This latter demonstration event is associated with the project, as the environmental stakes are at the core of the EFFORTS project (EFFective operation in pORTS).

During the demonstrations, we will share with you our vision of the future, and present you new products and guidelines to face currently unsolved problems.

We are expecting fruitful and effective discussions with the target audiences including policy makers, governmental agencies, port authorities notably environment responsible, port and terminal operators, port experts, other potential users of port services i.e. ship owner, shipping agents, industrial players...

Attached you will find the full package of information for the demonstration event, the programme, practical information and the registration form.

In order to receive you in the best conditions, please, return us, as soon as possible the registration document.

Should you have any questions, please do not hesitate to contact us.

We are looking forward to welcoming you soon in Le Havre.

Best regards,

Jean-Francois Emery
